

User Manual: Creating a Geofence

Introduction

This manual will guide you through the process of creating a geofence in our system. Follow the steps below to efficiently set up your geofence.

Steps to Create a Geofence

1. Access the Geofences Section

- Log in to your account.
- Navigate to the **Geofences** section in the main menu.

2. Create a New Geofence

- Click on the "**Create Geofences**" button.

3. Draw the Geofence

- Use the drawing tool on the map to outline the area of the geofence.
- Make sure to select the **type of geofence** you want to create (e.g., circular, rectangular, etc.).

4. Select Attributes

- Customize your geofence by choosing the following attributes:
 - **Color:** Select the color that will represent the geofence on the map.
 - **Assignment to group/unit:** Choose whether the geofence will be linked to a specific group or unit.

5. Save the Geofence

- Once you have completed the drawing and selected the attributes, press the "**Save**" button to finalize the creation of the geofence.
